Expanding Business Network Member Roll

This business network was founded in 1994. This notice is for executives who may want associate status and for entrepreneurs requiring a business network connection. Our goal was to create a substantial network of advisors and executives who have the experience and networks to bring value to our clients and perhaps the financial wherewithal to participate in ground-floor opportunities. These opportunities, while not without risk, offer tremendous upside potential. The Entree Network in cooperation with affiliates provides entrepreneurs with the ability to interact with those advisors and executives who share their passion and want to be part of educating, funding and building a new wave of American business success stories.

Entree Network, LLC ("TEN") works with select private firms as well as publicly traded entities which need strategic assistance. Although our client focus is on U.S. based entities, our team members have assisted clients and consummated transactions on six continents, and we welcome publicly traded as well as established privately held foreign firms to contact us.

Our network of advisors and executives is comprised of individuals and organizations with experience and networks in a wide variety of industry sectors and technical disciplines. Substantially all our associates come from high quality references, including certified public accounting firms, venture capital groups, financial institutions, law firms and successful business owners with whom our network members have worked in the past.

We have found that this approach not only provides our group with higher quality access, but also contacts that more closely match the requirements we are seeking for our client base. In many cases, these contacts will be friends or clients of the referring source. TEN encourages companies and individuals to refer quality prospects that meet our criteria for engagement acceptance. Subject to applicable rules, we are pleased to pay a finder's fee to referring sources.

TEN frequently works with other quality professional services firms on joint assignments when the necessity of such external technical skills is appropriate and beneficial to the client. TEN encourages the submission of proposals by minority owned firms that meet our criteria. We also have alliances with professional firms that specialize in assisting minority owned entities to ensure that all appropriate benefits, grants, and credits are received by such firms. Although the scope of TEN's services and client base are international,

TEN is a North Carolina based entity which supports the efforts of regional associations that help foster growth in the SE corridor. We also support the area not for profit associations.

THE ENTREE NETWORK

A national affiliation of business executives, private investors and resources organized to take advantage of selected business growth opportunities. The Entree Network of active and retired Fortune 500 executives works with management and partner groups involved with established, start-up and early stage companies in their implementation of strategic partnering plans, technology value enhancement, technology assessment, franchising development, angel investment, capital formation, partner search, due diligence, revenue ramp-up, key account access, acquisitions, mergers, sales, management approaches, marketing plans/strategies, board recruitment, executive search, development planning and other needs.
